

TO WHOMSOEVER IT MAY CONCERN

Financial fraud exceeding half a million dollars at Cricket Australia in past ~3 months and continuing

Think about what this game and the organisation behind it have been built on over the years: passion, dedication, hard work, and sacrifice. It doesn't take much for a few individuals, driven by their own interests, to undermine that for self-interest and put the reputation of both the game and the organisation at risk.

I am raising a set of concerns that have emerged over recent months within the Digital & Technology function at Cricket Australia and believed to have broader involvement. These observations, when viewed collectively, suggest well-orchestrated fraud contravening governance, procurement integrity, and organisational decision-making.

Balamurugan PM – General Manager, Digital and Technology at Cricket Australia is central to this financial crime. He has awarded Cricket Australia's technology contract/s worth over \$600K in less than past 3-months to his own company i.e. SST Cloud Pty. Ltd. and operating as owner of several entities carefully placing several fabricated executive profiles at helm to conceal his involvement.

His close association and ownership in SST Cloud Pty. Ltd. is explained below:

- SST Cloud Pty. Ltd.
 - current vendor receiving technology and cloud infrastructure migration work from Cricket Australia)
- TruFyre Technologies Pty. Ltd.
 - entity owned by Balamurugan PM – current Director as per ASIC records – ***exhibit 1***)

Entity	Business Location	Registered address	Registered	Ownership/Directors/Shareholders
TruFyre Technologies Pty. Ltd.	NSW, Australia	31 Wattleridge Crescent, North Kellyville, NSW 2155	Mar - 2025	Balamurugan PM Parthiban Somasundaram (<i>Parthiban's directorship cessation lodged with ASIC 16-Feb-2026</i>)
SST Cloud Pty. Ltd.	NSW, Australia	Unit 3, 129 A Jerralong Drive, Schofields, NSW 2762	Nov - 2025	Parthiban Somasundaram
TruFyre Technologies Private Limited	Coimbatore, India	#247 Basement Floor, Alagesan Road, Saibaba Mission, Coimbatore, Tamil Nadu, India 641011	Jan - 2025	Kuppusamy Srinivasan Prakash Sathish Achuthan
SST Cloud Solutions Private Limited	Coimbatore, India	No.247, Shiv Chambers, Alagesan Road, Saibaba Mission, Coimbatore, Coimbatore North, Tamil Nadu, India 641011	Oct - 2024	Kuppusamy Srinivasan Prakash Sathish Achuthan Vinaychand Vishal Saravanakumar Aruchamy
Smart Stram Tech	Coimbatore, India	No.247, Shiv Chambers, Alagesan Road, Saibaba Mission, Coimbatore, Coimbatore North, Tamil Nadu, India 641011	No official information available (~2018)	No official government records available

Observed connections/associations between the above-mentioned entities:

- Common directors and shareholders
- Companies registered to the same business address
- Fabricated executive and leadership profiles used to create false impression and hide actual operator/s

There are indications of involvement of another senior executive who has played a role in introducing Balamurugan PM into Cricket Australia. If accurate, it would be important to confirm whether there is awareness of these matters at the Executive level and whether adequate recruitment practices, including reference checks/employment screening were adhered to by Cricket Australia.

I would like to provide more context on the above and the basis for this fraud and how all of this has been planned and executed. This report needs to be read in full details (including relevant evidence provided as exhibits) to get the complete picture of how these sophisticated financial frauds were committed and the key players involved.

1. Balamurugan's established ownership in various entities

A. TruFyre Technologies Pty. Ltd. (ABN: 69685647358) – Australia

- As per ASIC records, this company is registered in NSW on 25-Mar-2025 under the classification “Limited By Shares” (**exhibit-1**)
 - ASIC document number 6EIZX2910 effective 25-Mar-2025.
- Officeholders and share structure include:
 - Balamurugan PM (Director, Secretary, Shareholder)
 - **Parthiban Somasundaram (Director, Secretary, Shareholder).**
- Parthiban Somasundaram ceased from Director and Secretary roles effective 21-Jan-2026 (backdated), with the shares dissolved. Cessation lodged with ASIC on 16-Feb-2026.
- Balamurugan PM continues as Sole Proprietor, Director and Secretary, with the company's principal place of business updated via ASIC form 484E on 16-Feb-2026
 - ASIC document number 7EDW40659 effective 16-Feb-2026

B. SST Cloud Pty. Ltd. (ABN: 50693152279) – Australia

- Registered in NSW on 24-Nov-2025 under “Limited By Shares” (**exhibit-2**)
 - ASIC document number 6EKPK1151 effective 24-Nov-2025
- Officeholders and share structure include:
 - **Parthiban Somasundaram (Director and Shareholder)**
 - Dhyandhi Ramakrishnan (Shareholder)

The above establishes a clear financial relationship between Balamurugan PM and Parthiban Somasundaram, with joint ownership and financial interests.

To date, SST Cloud Pty. Ltd. has been awarded over **\$600,000** worth of technology contracts approved by Balamurugan PM in his capacity as General Manager - Digital & Technology at Cricket Australia.

It is notable that Parthiban Somasundaram, who is currently a full-time employee at ING (**exhibit – 24**), is also listed as a director of SST Cloud Pty. Ltd. with ASIC. He appears to be a non-active (dummy) director on behalf of Balamurugan PM. Their past association and overlapping professional timeline at ING and AMP indicate a long-standing professional relationship and prior collaboration that has led to

this financial fraud and possibly financial fraud/s in the organisations where they have worked previously or currently working.

This raises serious questions:

- Undisclosed financial association between Balamurugan PM and Parthiban Somasundaram via TruFyre Technologies Pty. Ltd.
- Timing of Parthiban's exit as Director from TruFyre Technologies Pty. Ltd (lodged 16-Feb-2026) followed closely by the first purchase order worth ~\$3,50,000 raised by Cricket Australia on 18-Feb-2026.
- Internal meeting records indicate SST Cloud informal engagement began in ~Dec 2025, with contractors commenced onboarding within Cricket Australia's internal systems from 14-Jan 2026 while both, Balamurugan and Parthiban, were holding positions of Director within TruFyre Technologies Pty. Ltd.
- Purchase orders appear to have been intentionally delayed until after ASIC updates of Parthiban's exit from TruFyre Technologies Pty. Ltd. The application to ASIC was received and processed on 16-Feb-2026 with Parthiban's cessation backdated to 21-Jan-2026.
- Furthermore, no clear statement of work or supporting documentation exists within Cricket Australia's internal systems indicate that procurement (RFP) and legal processes have not been complied with.
- Raising and approval of purchase orders by Balamurugan was fast-tracked, in some cases within 24 hours, without visible due diligence of this new supplier i.e. SST Cloud Pty. Ltd. which only established as an Australian business in Nov-2025 as a façade entity to Balamurugan owned TruFyre Technologies Pty. Ltd. with intent to conceal transactional footprints.

C. SST Cloud Solutions Private Limited (CIN: U62013TZ2024PTC032844) – India

- Incorporated on 29-Oct-2024
- Directors include (**exhibit-5**):
 - Vinaychand Vishal
 - Saravananakumar Aruchamy
 - **Kuppusamy Srinivasan Prakash**
 - **Sathish Achutan**
- Registered address (**exhibit-3**):
No.247, Shiv Chambers, Alagesan Road, Saibaba Mission, Coimbatore, Tamil Nadu, India

D. TruFyre Technologies Private Limited (CIN: U62013TZ2025PTC03348) – India

- Incorporated on 30-Jan-2025
- Directors include (**exhibit-6**):
 - **Kuppusamy Srinivasan Prakash**
 - **Sathish Achutan**

- Registered address (**exhibit-4**):
#247, Basement Floor, Alagesan Road, Saibaba Mission, Coimbatore, Tamil Nadu, India

The above establishes a clear linkage between the India-based entities:

- Common directors - Kuppusamy Srinivasan Prakash and Sathish Achutan
- Same registered address at Coimbatore, Tamil Nadu, India.

Further indicators that all the above-mentioned entities, based at Australia and India, operate as one structure:

- Shared social media presence (Instagram, Facebook, X/Twitter)
- Similar hackathon promotions and templates used across both entities
- Common professional footprints (LinkedIn)
- SST Cloud (.com.au) linking to India domain (.in)
- Hyperlinks on NSW government site where TruFyre is listed as a business pointing to social media platform i.e. Instagram, referencing to hackathon events held at same business location of SST Cloud, Coimbatore, India.

All the above are independently verifiable and supported by documented evidence (**exhibits 12-18**) provided at the end of this report.

E. Smart Stream Tech – India

- This is another entity that belongs to same conglomerate
- Established around 2018 (as per their website – **exhibit 8**)
- Claims both domestic and international clients, including NRL Australia (**exhibit-7**) where Balamurugan was previously employed before joining Cricket Australia
- No clear government registration record found.

Observations:

- Separate website but uses “SST” branding
- Leadership profiles are exact match to those listed on SST Cloud website:
 - Vishal Jain (CTO)
 - Prakash Srinivasan (COO)
 - Sathish (CMO)
 - Saravana Kumar (CFO)

Upon review, these profiles raise significant concerns:

- No verifiable professional presence
- Names inconsistent with official records
- Images appear synthetic or AI-generated

Example: Vishal Jain (CTO – at SST Cloud and Smart Stream Tech) – (**exhibit 19**)

- No digital or professional footprint i.e. participation in forums, posts, public speaking. Highly unlikely for an executive profile in Tech industry

- A detailed image (exhibit-19) analysis indicates likely AI-generated or heavily enhanced portrait
 - skin smoothing and lack of micro-texture (common in GAN outputs).
 - background blur appears synthetic (uniform bokeh without depth irregularities)
 - edge blending around head/shoulders is slightly “soft” and painterly
 - lighting on face is evenly diffused without natural shadow falloff
 - facial symmetry slightly “too balanced”

Conclusion:

- Likely fabricated identity used to create false credibility
- Suggests broader pattern of misrepresentation across leadership profiles
- This is certainly a dummy profile and a made-up name of a certain Vinaychand Vishal who is listed as one of the directors at SST Cloud, India. No publicly identifiable image/s available of Vinaychand Vishal.

This indicates that most (**exhibits 20 -23**), if not all, leadership roles presented across SST Cloud may not represent real individuals and are being used to conceal actual operators.

Given the established connections, it is believed that Balamurugan PM is central to this structure.

There is a strong likelihood that SST Cloud as a relatively new entity is created to replace Smart Stream Tech’s digital footprints, attempts to conceal traceability, and reposition the business to lure international clientele and especially from Australian territory where Balamurugan is based. Also, notable that Balamurugan after living in Australia for well over a decade still holds Indian citizenship and passport, which makes it easier for him to move/manage finances directed to his India based entities while continue to operate in the ownership capacity.

Timing sequence (key events)

- TruFyre registered in Australia with Balamurugan and Parthiban as Directors: 25-Mar-2025
- Balamurugan introduced into the Strategic Advisory role at Cricket Australia: Aug-2025
- SST Cloud registered in Australia with Parthiban as Director: 24-Nov-2025
- Parthiban’s cessation from Director role at TruFyre effective: 21-Jan-2026 (backdated)
- Parthiban’s cessation from TruFyre lodged with ASIC: 16-Feb-2026
- Purchase orders for SST Cloud raised from Cricket Australia: from 18-Feb-2026
- First, \$350,000 purchase order approved by Balamurugan: 19-Feb-2026
- Additional purchase orders worth \$300,000 raised and approved: Feb-2026 to Mar 2026
- Engagement activity with SST Cloud already began: ~Dec 2025

Pre-emptive hiring example

- Workday (HR System) project assessment at Cricket Australia is currently led by an analyst, based at Sydney, linked to Balamurugan and Sangeetha Dharamaraj (Head of Platforms & Operations at Cricket Australia)
- SST Cloud began advertising Workday consultant roles since early Feb 2026 on their LinkedIn pages (**exhibit-9**), even before Cricket Australia determined the project scope of works which included the need to hire Workday consultants.

Indicates:

- Likely pre-determined outcome and process is not fully independent
- Inflated project scope and costs are expected to benefit SST Cloud, Balamurugan and Sangeetha.

2. Biased Restructuring for Personal Gain: Leadership changes and hiring decisions

Since August 2025, after Balamurugan joined Cricket Australia:

- Several Heads of Department were made redundant
- These individuals had strong organisational context and were likely to challenge the current decisions

At the same time-

- New hires have:
 - prior association with Balamurugan
 - rapid placement into senior roles
 - role definitions aligned to individuals.

Examples include:

- Role titles adjusted on LinkedIn profiles to match candidate profile
- Senior roles filled by individuals with limited relevant experience
- Concentration of hires in Sydney while core teams remain in Melbourne.

Further observations:

- All new hires did not meet advertised role selection criteria.
- All individuals based at Sydney, including consultants, share same ethnical background (South Indian heritage), predominantly most of them have their hometown and early educational experience in and around Coimbatore, Tamil Nadu in India. This includes Balamurugan and his onshore business associate Parthiban. They all are also linked to same professional timeline at NRL and other companies. These are not mere coincidences. This pattern establishes a long-standing association and possible family connections. This structure allows them to operate closely and form a close syndicate for financial gains by committing frauds.
- All selection decisions, when looked closely, inconsistent with standard hiring practices of Cricket Australia.

This points to a **deliberate consolidation of control**.

Below examples on key roles and individuals hired into key position by Balamurugan:

i. Sangeetha Dharamaraj – Head of Platforms & Operations

- The speed of hiring stands out immediately. The role was advertised internal only on 30-Oct-2025, and within a few days, she was not only selected but also flown into Melbourne and onboarded by

~13-Nov-2025. This is not consistent with any standard hiring process within Cricket Australia for a role of this level. There is no record of this role published to external applicants in the market.

- There is a clear prior working relationship with Balamurugan at NRL. This is not incidental. It establishes familiarity and alignment before joining Cricket Australia. Not uncommon under normal industry circumstances but too deliberate in this case.
- Her previous role at NRL (research shows, **exhibit 25**) was Head of Site Reliability Engineering, which is a significantly narrower function focused on:
 - system reliability
 - incident management
 - operational stability.

This is materially different from the broader Head of Platforms & Operations role, which requires:

- infrastructure strategy
- platform engineering leadership
- cloud transformation ownership
- cloud security and cyber governance oversight
- data governance and protection.
- Despite this gap, she was not only appointed but also given additional responsibility of a critical Cyber Security portfolio after the Head of Cyber Security role was made redundant. These further stretches credibility around capability alignment.
- However, her current LinkedIn profile shows:
 - inflated title claims at NRL as the Head of Cloud & Technology Operations
 - Research on NRL Australia LinkedIn people section shows that there are other people at NRL who own the space for several years that Sangeetha claimed that she was operating. Sangeetha's NRL title inflation is a deliberate attempt to justify the role selection at Cricket Australia without relevant credentials. Given, Balamurugan's involvement, would justify that he is the mastermind behind these.
 - incorrect tenure representation by Sangeetha on her LinkedIn profile shows that she has been working at Cricket Australia for more than 1 year 3 months instead of recent Nov-2025 start – **exhibit 26**).

All the above are not minor discrepancies. It reflects continued active misrepresentation of experience and timeline.

- The combination of:
 - prior association with Balamurugan
 - rapid hiring into the senior role with no real credentials
 - disregard to Cricket Australia hiring practises
 - mismatch in capability
 - inflated credentials to meet Cricket Australia role selection

Strongly suggests that the hiring decision was planned, pre-determined and influenced, rather than merit based.

- Given her current role and proximity to decision-making, it is a “High Risk” that she is:
 - aware and involved of vendor engagement patterns especially with her direct involvement with the work SST Cloud has been awarded
 - aligned with ongoing decisions where ‘Workday’ analysis is currently made and is playing a pivotal role to influence project scope and inflate costs
 - participating, directly or indirectly, in the current operating model for her own personal financial gains.

ii. Sagar Srinivas – Senior Engineering Manager

- Sagar's appointment represents a clear step-up beyond his demonstrated experience.
- His previous role as Engineering Manager at NRL, while still questionable if it is real after seeing above example, does not align with the expectations of a Senior Engineering Manager at Cricket Australia, especially given:
 - scale of systems
 - complexity of delivery
 - leadership expectations.
- There is no evidence of:
 - strong people leadership
 - engineering strategy capability
 - delivery ownership at scale.
- Internal observations (meetings, forums) indicate:
 - limited ability to challenge decisions
 - low presence in technical or strategic discussions.
- His role appears less about leadership and more about:
 - alignment with Balamurugan
 - execution without resistance.
- The pattern here is consistent:
 - known individual
 - placed into elevated role
 - unlikely to question authority.

This is not a capability-driven hire. It is a **control-aligned placement**.

iii. Alysa Turnbull – Head of Delivery & Engineering

- Alysa's appointment is one of the most critical in this structure.
- Despite stronger internal and external candidates with more direct experience, she was selected for a role that demands:
 - deep delivery leadership
 - engineering oversight
 - product and CX alignment.
- It suggests:
 - selection did not align with defined selection criteria i.e. educational qualification/certifications and broader industry experience overlooked.
- Her background reflects:
 - program/project delivery exposure
 - limited engineering leadership depth
 - limited experience managing large-scale delivery portfolios and direct vendor engagement.
- Despite this, she now holds:
 - Delivery & Engineering portfolio
 - CX Product portfolio (post Head of CX role redundancy).
- Most concerning-
She initiated the first purchase order (18-Feb-2026) for SST Cloud:
 - without a defined statement of work

- without following RFP process
- without procurement rigour.

This is not a procedural miss. It indicates:

- direct instruction or alignment
- willingness to bypass controls.
- There are also indications that:
 - another senior executive influenced her appointment to this critical delivery position
 - this connects back to the same executive who introduced Balamurugan to Cricket Australia.
- This creates a layered risk:
 - not just individual action
 - but **coordinated decision-making for personal financial gains.**

3. Construction of timeline since Balamurugan appointed to Cricket Australia

~August 2025 onwards

#	Event	Timeline
1	Balamurugan PM appointed into Strategic Advisor consulting role to embed Technology/ organisational restructure in July 2026.	August 2025
2	Head of Solution Delivery and Head of Platforms & Strategy roles were made redundant.	~Sept 2025
3	Head of Cyber Security and Head of CX roles report early conflicts with Balamurugan around his work ethics and decision-making. Another senior executive/s had to step-in for mediation. This should be on internal records.	~Oct 2025
4	Balamurugan travels to India in business class (<i>despite Cricket Australia's continued operational cost pressure</i>) to meet HCLTech (offshore technology partner) operations based in India. Balamurugan previously openly opposed HCLTech's engagement and was publicly vocal to end their long-standing contract with Cricket Australia. This was understandably backed by the same senior executive associated to Balamurugan, to clear path for SST Cloud engagements and direct the flow of Cricket Australia funds to the firm where Balamurugan has direct financial interest i.e. SST Cloud for significant financial gains.	~Nov 2025
5	SST Cloud registered in Australia (ASIC) with Balamurugan's close associate and current business partner at TruFyre - Parthiban Somasundaram listed as Director. At this point Balamurugan's intentions are clear to commit financial fraud and re-direct Cricket Australia's technology funds to SST Cloud.	24-Nov-2025
6	Balamurugan travels to his hometown Coimbatore, Tamil Nadu in India, after finishing his official HCLTech India visit. SST Cloud and TruFyre India operations are based at Coimbatore. This is where a Technology Hackathon activity (25-Nov) is jointly organised by SST Cloud and TruFyre. Balamurugan's travel timelines to meet HCLTech are not coincidental rather planned in a way that he could visit his business operations at Coimbatore, Tamil Nadu, India to attend the event personally.	Date of Hackathon (exhibit-27) 25-Nov-2025
7	Balamurugan Returns to Australia (internal Cricket Australia travel records should confirm exact date and origin city).	~27-Nov-2025 onwards
8	SST Cloud representatives start appearing in internal Cricket Australia forums/meetings as technology supplier without formal contractual relationship with Cricket Australia.	~Dec 2025

9	SST Cloud contractors onboarded into Cricket Australia systems (At this time Parthiban and Balamurugan are still active Directors in TruFyre and Parthiban being sole Director in SST Cloud).	14-Jan-2025
10	SST Cloud begins active engagement (no formal scope of works documentation)	~Jan 2026
11	Parthiban's cessation as Director from TruFyre lodged with ASIC	16-Feb-2026
12	First purchase order to SST Cloud created by Alysa Turnbull (no RFP, no SOW, procurement process ignored)	18-Feb-2026
13	Purchase order of ~\$350,000 approved by Balamurugan	19-Feb-2026
14	Subsequently, additional purchase orders (~\$300,000 total) raised and approved by Balamurugan without documentation and bypassing established processes	Feb – Mar 2026
15	Balamurugan formally appointed GM – Digital & Technology at Cricket Australia	25-Feb-2026
16	Head of Cyber Security and Head of CX roles made redundant shortly after Balamurugan's appointment and those portfolios merged into Sangeetha Dharamaraj and Alysa Turnbull's existing portfolio despite no alignment on the experience. This structure is to create an environment where Balamurugan's authority and financial decisions remain unchallenged.	06-Mar-2026

The pattern across hiring, vendor selection, and timing is too consistent to ignore.

- People who could question decisions were removed
- Known individuals were brought in quickly
- Vendor engagement started before formal approvals circumventing procurement practices
- Paper trail appears to have been adjusted after the fact

This is not isolated behaviour. It shows planning, sequencing, and controlled orchestration.

If this is not investigated properly and immediately, the exposure will go beyond financial loss. It will also directly impact the credibility of Cricket Australia and the game it represents.

4. Suggested next steps:

- Initiate an independent investigation immediately based on the evidence presented, which indicates conflict of interest and proven financial misconduct.
- Suspend Balamurugan PM with immediate effect and revoke all system and decision-making access to prevent any influence over the investigation or alteration of internal records.
- As part of a fair and unbiased investigation, suspend all appointments where Balamurugan has had direct or indirect involvement. This includes Sangeetha Dharamaraj, Sagar Srinivas, and Alysa Turnbull's appointment to senior leadership positions. As these roles have access to all critical procurement data, finance, and engineering logs which they may attempt to temper with.
- Suspend all ongoing work being carried out by SST Cloud and remove all associated consultant access immediately to prevent any risk of further activity or evidence manipulation.
- Secure and preserve all digital evidence. There is a high likelihood of attempts to alter or remove external records. Thus, it is important to archive all relevant website information & links, documents, and screenshots for a forensic verification.
- Review all conflict-of-interest disclosures submitted by Balamurugan, if any, and assess their completeness and accuracy.
- Reassess all procurement decisions involving SST Cloud and conduct a forensic review of financial transactions both current and past.

- Validate the independence and integrity of any ongoing assessment processes currently linked to vendor evaluation or project allocation.
- Conduct a targeted review of recent senior hiring decisions, including decision-makers, process adherence, and alignment to role criteria.
- Re-evaluate vendor due diligence conducted for SST Cloud, including verification of leadership profiles, organisational legitimacy, and capability claims.

Regards,

cj

13-Apr-2026

a passionate Cricket lover,

custodian of the game, and

someone who deeply cares what we represent at Cricket Australia.

LinkedIn post from SST Cloud. The post is titled "We're Hiring | Workday Integration Consultant". It includes the following details:

- Location: Coimbatore
- Experience: 3-7 Years
- We are looking for a skilled Workday Integration Consultant to join our growing team. The ideal candidate will have strong hands-on experience in designing, developing, and supporting Workday integrations across multiple modules.
- Key Responsibilities:
 - Integration Design & Development
 - * Design, develop, and maintain Workday integrations using Workday Studio, EIBs, Core Connectors, and APIs.
 - * Build inbound and outbound integrations for HCM, Payroll, Financials, Time Tracking, and Benefits modules.
 - * Translate business and functional requirements into detailed technical integration designs.
 - * Ensure integrations are scalable, reusable, and aligned with Workday best practices.
 - Advanced Troubleshooting & Support
 - * Own and resolve complex integration issues, including L2/L3 production incidents.
 - * Perform root cause analysis for data mismatches, failures, and performance issues.
 - * Analyze Workday logs, integration event data, and error reports to quickly identify and resolve issues.
 - * Collaborate with Workday functional consultants and external vendors to resolve

Sangeetha Dharmaraj

Head Of SRE

Contact

Sangeetha Dharmaraj has extensive experience in project management and leadership roles. Sangeetha is currently the Head of SRE at the National Rugby League since 2023. Prior to that, they worked at HCL Technologies as Deputy General Manager and Associate General Manager. Sangeetha also has experience at Infosys as a Senior Project Manager, where they successfully delivered digital initiatives and programs. Sangeetha has worked at various organizations such as Ausgrid, Tennis Australia, bp, Cablevision, SCTE, ServiceMaster, and PricewaterhouseCoopers - Service Delivery Center (PwC SDC), where they excelled in project management and Scrum Master positions. Sangeetha is known for their ability to lead high-performing teams and drive innovative strategies. Sangeetha has a strong conceptual understanding of digital technologies and has a track record of delivering successful projects and achieving client satisfaction.

Sangeetha Dharmaraj completed their Bachelor of Engineering (BE) degree in Electrical, Electronics, and Communications Engineering at Madras Institute of Technology from 2002 to 2006. In 2019, they obtained a certification as a Certified ScrumMaster (CSM) from Scrum Alliance. [Less](#)
